CGH 25

MANUAL PALLET JACK
5500 lbs / 2500 kg

STANDARD FEATURES

Frame and Forks

- The frame and forks of the CGH are of a welded steel structure, with heavy reinforcing at high load point areas.
- Rounded tapered fork ends minimize damage at pallet entry.
- Pallet entry and exit rollers allow easy pallet entry/exit with minimum damage
- All bearing points easily accessible for ease of maintenance and lubrication.

General

- Totally enclosed bearings prevent dirt ingress and ensures long service life.
- Steel drawbar with protected handle for strength and safety.
- Pivot mounted steer wheels ensure high stability on uneven surfaces.
- 210 degree steer handle arc enables easy maneuvering in confined areas.
- Large 180 mm polyurethane steer wheels for long life and improved stability.
- Single polyurethane load wheels as standard.

Drawbar and Control Handle

- Manufactured from steel for extra strength, with a closed loop design control handle, the drawbar gives perfect control and protection for the operator's hands in restricted areas. The covered handle gives a "warm feel" ensuring positive control in all environments.
- Three position hydraulic control - Lifting - Neutral - Lowering mounted inside the control handle on the right hand side allows pumping at the most convenient angle for the operator and free handle when the truck is moving.

Hydraulics

- Heavy duty robust design with hard chrome-plated pistons with overload safety device.
- "Single point service" easily replaceable hydraulic unit with easy access.
